VersaCross fill

Spare parts guide

VersaCross fill

The patented VersaCross fill is designed and tested in the <u>BAC</u> <u>laboratories</u>.

Benefits

- Improves thermal performance of original BACross fill by an average of 7,3%
- · easy core inspection: sheet by sheet without dismantling
- · easy cleaning: sheet by sheet inside the tower
- · efficient installation with model specific retrofit kits
- · low shipping costs: nested shipment, smallest fill stagging

Characteristics

- BAC patented design with telescopic fill support
- integrated eliminators and louvers
- · complete installation kit supplied to upgrade existing unit
- self-extinguishing PVC material, impervious to rot and biological attack
- for temperatures up to 50°C

We use VersaCross fill for upgrading

• S3000 of previous generation
